

Detailed Rubric Presentations & Peer Feedback (100 points)

1. Comprehension & Technical Depth — 20 points

A. Accuracy of Paper Summary (10 points)

Score Range	Descriptor
9–10 (Excellent)	Provides a clear, precise, and accurate summary of the paper’s motivation, problem, contributions, methods, and results. No conceptual errors. Key elements are contextualized within DRL literature.
7–8 (Good)	Summary is mostly accurate with only minor omissions or slight ambiguities. Major contributions and results are correct.
5–6 (Satisfactory)	Partial understanding: some important aspects missing or oversimplified. A few non-critical inaccuracies.
3–4 (Weak)	Summary contains several inaccuracies or misunderstandings. Critical components of the method or results are unclear or wrong.
0–2 (Poor)	Major misunderstandings or missing essential content. Summary fails to convey the nature of the work.

B. Understanding of Methods and Results (10 points)

Score Range	Descriptor
9–10 (Excellent)	Demonstrates strong conceptual and mathematical understanding. Explains algorithmic steps, architecture, experimental setup, metrics, and results with clarity and accuracy. Shows ability to interpret results beyond surface-level description.
7–8 (Good)	Understands core methods but lacks some nuance or deeper intuition. Explanations are correct but may rely heavily on the paper’s own wording.
5–6 (Satisfactory)	Demonstrates partial but incomplete understanding. Some components are correct, others vague or unclear.
3–4 (Weak)	Limited grasp of technical content. Explanations are shallow, missing, or partly incorrect.
0–2 (Poor)	Major conceptual errors; does not demonstrate understanding of the methodology or results.

2. Critical Analysis — 30 points

A. Identification of Strengths (10 points)

Score Range	Descriptor
9–10 (Excellent)	Clearly identifies and explains the paper’s technical strengths, novelty, and empirical rigor with thoughtful justification.
7–8 (Good)	Identifies several strengths but explanations may be brief or less insightful.
5–6 (Satisfactory)	Strengths are stated but generic, superficial, or not well supported.
3–4 (Weak)	Only a few basic strengths identified; little justification.
0–2 (Poor)	No meaningful discussion of strengths.

B. Identification of Weaknesses & Limitations (10 points)

Score Range	Descriptor
9–10 (Excellent)	Critically evaluates limitations (e.g., assumptions, experimental design, generalization gaps, missing baselines). Provides evidence-based reasoning.
7–8 (Good)	Identifies important weaknesses but misses subtle or deeper issues.
5–6 (Satisfactory)	Mentions weaknesses but at a superficial level; lacks detail or justification.
3–4 (Weak)	Very limited critique; lacks specificity.
0–2 (Poor)	No critique or entirely incorrect criticism.

C. Discussion of Gaps & Future Work (10 points)

Score Range	Descriptor
9–10 (Excellent)	Insightfully identifies gaps, open research questions, or meaningful avenues for extension. Shows strong understanding of the broader DRL field.
7–8 (Good)	Suggests reasonable future work but lacks depth or originality.
5–6 (Satisfactory)	Provides generic or somewhat obvious suggestions (e.g., “test on more environments”).
3–4 (Weak)	Minimal or unclear suggestions.
0–2 (Poor)	No future work identified.

3. Presentation Quality — 30 points

A. Organization & Structure (10 points)

Score Range	Descriptor
9–10 (Excellent)	Presentation is logically structured (motivation → background → method → results → critique). Transitions are smooth; flow enhances understanding.
7–8 (Good)	Clear structure but transitions or ordering could be improved.
5–6 (Satisfactory)	Basic structure present but sections may feel disconnected.
3–4 (Weak)	Poorly organized; audience struggles to follow the narrative.
0–2 (Poor)	No coherent structure.

B. Slide Design & Visual Communication (10 points)

Score Range	Descriptor
9–10 (Excellent)	Slides are clean, readable, visually engaging. Effective use of diagrams, figures, and minimal text. Equations are presented with intuition.
7–8 (Good)	Slides generally good but may be text-heavy or lacking some clarity.
5–6 (Satisfactory)	Adequate slides but cluttered, inconsistent styles, or hard-to-read elements.
3–4 (Weak)	Poor visuals, inconsistent formatting, overloaded slides.
0–2 (Poor)	Slides extremely unclear or missing.

C. Verbal Delivery & Time Management (10 points)

Score Range	Descriptor
9–10 (Excellent)	Clear, confident delivery. Excellent pacing. Finishes within time. Handles questions well.
7–8 (Good)	Generally clear but occasional issues (e.g., pacing, filler words).
5–6 (Satisfactory)	Understandable but uneven pacing; relies heavily on slides or script.
3–4 (Weak)	Delivery unclear or difficult to follow; major timing issues.
0–2 (Poor)	Presentation not delivered effectively.

4. Peer-to-Peer Discussion Group Engagement & Feedback — 20 points

A. Quality of Questions & Engagement (10 points)

Score Range	Descriptor
9–10 (Excellent)	Actively engages with partner group. Asks insightful, scientifically / technically relevant questions.
7–8 (Good)	Asks good but somewhat surface-level questions. Engages consistently.
5–6 (Satisfactory)	Participates but questions are basic or reflect incomplete understanding.
3–4 (Weak)	Minimal participation; questions unclear or not technically relevant.
0–2 (Poor)	No meaningful engagement.

B. Constructiveness & Usefulness of Feedback Provided (10 points)

Score Range	Descriptor
9–10 (Excellent)	Feedback is specific, actionable, evidence-based, and balanced (strengths + suggestions). Significantly improves the partner group's work.
7–8 (Good)	Feedback is helpful and mostly actionable but may lack depth in places.
5–6 (Satisfactory)	Feedback is generic but correct; somewhat useful.
3–4 (Weak)	Vague, overly general, or not constructive.
0–2 (Poor)	No feedback or irrelevant/inaccurate feedback.
